## Comprehensive Condition Monitoring Solutions

### Industry leaders join forces to serve US manufacturing

**Philadelphia, April 17, 2018 – PRUFTECHNIK Inc. and IVC Technologies, both long-time leaders in the condition monitoring industry, have joined forces to provide a comprehensive condition monitoring solution for clients throughout North America.**

PRUFTECHNIK Condition Monitoring Services powered by IVC Technologies combines the strengths of PRUFTECHNIK's suite of high-quality alignment and condition monitoring tools and IVC Technologies 30+ years of providing extensive condition monitoring services to the industry.

Bringing together these two industry innovators will enable manufacturers to boost their maintenance organizations' reliability performance.

*"PRUFTECHNIK USA was able to add more than 30 new people to the organization since its creation in 2016 to provide high-quality customer service. However, it has become obvious that it is an ideal timing and opportunity to collaborate with an established world-class organization, such as IVC Technologies to reach the next level and to extend our service offering across the continent, especially in the Condition Monitoring field. I am extremely excited about this new partnership with IVC. We are now ready to fulfill any kind of customer request nationwide with qualified service personnel",* comments Florian Buder, CEO PRUFTECHNIK North America.

*"IVC Technologies is very excited to offer condition based monitoring services through a world-class organization such as PRUFTECHNIK. With over 30 years in the CbM field, we have seen many vibration platforms come and go. I can say with great confidence that IVC's analysts will be carrying PRUFTECHNIK analyzers far into the future as we continue on our path of delivering the most versatile and valuable condition monitoring services in the industry. The partnering of IVC Technologies and PRUFTECHNIK USA is not only a win-win for our two companies but also for our customers",* adds Pete Epperson, President IVC Technologies.

#### **About PRUFTECHNIK Inc. USA**

Successfully launched in 2015 with offices in Philadelphia and San Diego, PRUFTECHNIK Inc. USA can provide the local support to North American customers for their entire product catalog.
